Secure USB Solutions

Portable storage media is used widely as an essential tool to conveniently carry and share large volumes of data. **But this freedom has created the increased possibility of sensitive data being lost or stolen.** Responding to this need Verbatim has focused on a reliable Security Storage Product for Small Businesses.

By European and local law (EU Directive 95/46/EC) you are obliged to protect personal data. A data loss incident is no longer seen as an unfortunate accident; now there is a high possibility that an organisation or individual executive will be subject to legal action. Those responsible need to be aware beside the value of their data itself; today, data loss is a significant legal and regulatory issue.

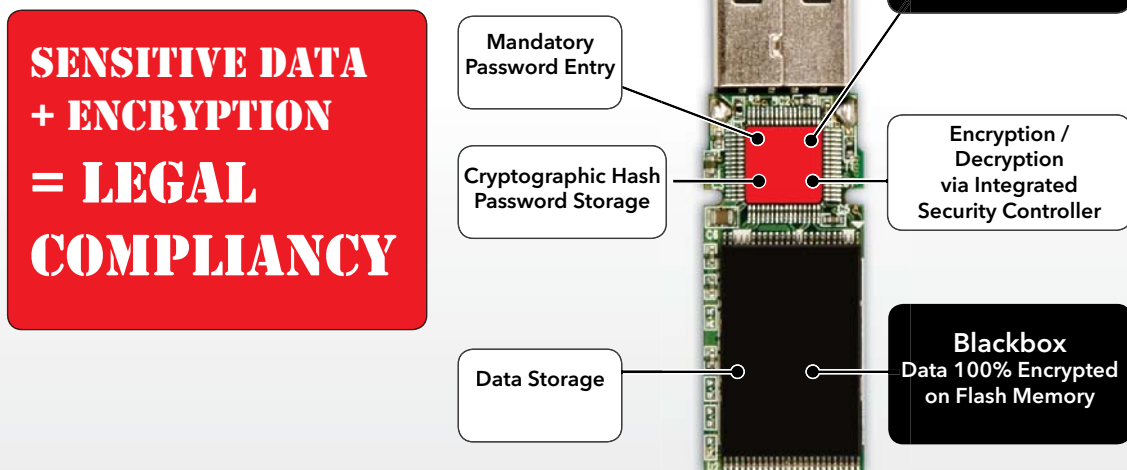

Verbatim is owned by the Mitsubishi Chemical Corporation Group, and its reputation for quality and reliability in the storage industry is well renowned worldwide. Over its 40 year history, and now with its security range, Verbatim has developed a portfolio of digital storage solutions matching and exceeding requirements of modern society today.

Verbatim Secure 'n' Go™ Product Range

- Secure Data
- Legal Compliance
- Reliability
- Innovation
- Hardware Encryption
- Quality
- Experience
- Storage Solutions

256-bit AES encryption

256-bit AES encryption is the strongest form of encryption commonly available. It is the most accepted algorithm in the industry and therefore Verbatim's flash memory is based on it.

Small Business Security HARDWARE

Verbatim's Secure 'n' Go Small Business Security Pack is a highly practical and reliable security device - ideal for any professional purpose. With its security controller-based hardware it delivers high-level security for your documents or other important files.

Key Benefits

- ✓ Military strength encryption
- ✓ No software installation
- ✓ Mandatory password entry
- ✓ 100% data encryption guaranteed
- ✓ Windows 7 compatible

Secure 'n' Go Small Business Security Pack Specifications:

- Interface: USB 2.0
- Capacities: 4GB, 8GB, 16GB
- Data Retention: 10 Years
- Power Source: USB Bus (No batteries required)
- Operating Systems: Windows XP, Vista and 7
- Secure 'n' Go Small Business Security Pack contents:
USB Drive 256bit Hardware Encryption + Endpoint Protection Software
- Product Dimensions: 64mm x 21mm x 11mm L x W x H)
- Product Weight: 13.8g

Secure 'n' Go - Small Business Security Pack

	CAPACITY	PART NO	HARDWARE ENCRYPTION
Secure 'n' Go Small Business Security Pack	16GB	43998	256bit
Secure 'n' Go Small Business Security Pack	8GB	43997	256bit
Secure 'n' Go Small Business Security Pack	4GB	43996	256bit

Make sure only devices that you trust can be accessed on your PC. Endpoint Protection software will do the job and limit your exposure dramatically.

**SECURE USB DRIVE + ENDPOINT PROTECTION
= SECURE DRIVES IN USE ONLY**

Small Business Security SOFTWARE

For professions where security of data is vital, the Secure 'n' Go Small Business Security Pack offers a complete and easy-to-use solution incorporating data encryption and endpoint protection. The 256bit AES hardware encrypted USB drive ensures that all data saved on it is 100% secure, and the embedded endpoint protection software will only allow approved devices access to download data from your computers, helping to prevent data leakage, data theft or other threats posed by unauthorised portable storage devices including USB flash drives, MP3 players, iPods or digital cameras. Easy to handle, quick to install and intuitive to use, the Secure 'n' Go Small Business Security Pack is ideal for organisations that may not have a full time IT administrator but still require a robust security solution for their data.

Device Control

Authorize the devices that are allowed access to data and those that are not.

File Tracing

Record file properties of files that are written or read from or to portable storage devices for later analysis.

Device Logging

E-Mail Notification / Alerts

In case an unauthorized device is connected to a protected PC the administrator has the option to be notified via e-mail.

Network "Offline" Capability

When a PC (e.g. a Notebook) is disconnected from the local network, the USB endpoint protection will remain, working as configured. The e-mail notifications are sent at the next network connection.

Administrative Control / Configuration Password

Only the PC's administrator is allowed to authorize devices and an optional password gives additional protection in an environment where many users are having administrative rights.

Multilingual User Interface: English, German and French

The simple administrative user interface is multilingual and allows for a fast and easy setup on your PC.

System Requirements

Windows 7

Windows Vista

Windows 2003

Windows XP (SP2)

Software administrator rights required

Is your data secure?

Are you legally compliant?
